WHY SPONSOR?

Sponsorship is more than just a contribution, it's a partnership in hope, awareness, and progress. By becoming a sponsor of the Richard J. Wolnik Foundation, you'll play a critical role in advancing research, spreading awareness, and honoring Dick's vision of a world free from ALS.

Your support helps us fund groundbreaking research aimed at finding the causes of ALS and driving toward a cure. Together, we can give ALS the visibility it needs and deserves.

ABOUT THE FOUNDATION

Dick Wolnik was so much to so many: a father, brother, friend, son, uncle, but most importantly, an inspiration. Throughout his battle with ALS, he remained hopeful, optimistic, and faithful.
Diagnosed in early 2021, Dick refused to let the disease define him. He fought hard every day and founded the Richard J. Wolnik Foundation for ALS Research, driven by his dream of finding a cure.
His story is one of courage, determination, and hope. He believed in putting the fun back in fundraising, always finding optimism even in the toughest moments. Through the foundation, we carry his spirit forward, honoring his legacy and raising funds to help find a cure.

Dick was an ALS patient at Massachusetts General Hospital (MGH) and The Sean M. Healey & AMG Center for ALS, actively participating in their experimental drug trials. From the moment of his diagnosis, he dedicated himself to researching clinical and scientific advancements, quickly realizing that ALS drug development was severely underfunded.

Today, his mission lives on through the foundation, ensuring that 100% of funds go directly toward supporting cutting- edge research led by Dr Merit Cudkowicz & Dr. Suma Babu's through the ALS MyMatch initiative at MGH and the Healey AMG Center. This research is focused on advancing the most promising clinical treatments for ALS.
